Overview

Derivatives are financial products whose value depends on the price of other financial products (e.g. stocks, bonds, interest rates, foreign exchange rates or commodities). This course provides an introduction to standard derivatives like options and futures. It will cover basic valuation principles as well as standard valuation models. The focus of this course is on the practical implementation and calibration of these models.

Student Speak

Dr. Pasad Agashe

“ I used to trade with two eyes, but this course has given me a third eye, allowing me to observe the dynamics behind the candlesticks, such as how option chain parameters affect intraday price action!

Shrenik Doshi

“ It was an excellent course from which I learned a great deal, and as a result, I am now capable of managing both my own and my father's portfolios.

Sarita Agarwal

“ Everything was well-coordinated, from registration to course delivery. The instructors are highly skilled and knowledgeable about their respective training programs. All of the seminars had been really instructive. The practical examples we received during the sessions were quite beneficial.

Lalit Sharma

“ I was unsure if I would be able to understand it because I did not come from a financial background. The BIL informed me that they have experienced Lecturers who will explain everything to us in a way that we can understand. I am quite pleased that I enrolled in the course since it has greatly aided my professional development.
