

Certificate Program on **Financial Statement analysis using excel**

6 Days

Live Online

Mumbai | Delhi | Kolkata

Overview

Excel is essentially a complete small-scale enterprise management system itself with substantial power. Unfortunately, its capabilities are largely under-appreciated and overlooked. Excel can handle much larger problems than most users recognize— including those who have used it for years. It is flexible and can solve a wide diversity of financial and other business problems. Excel provides a wide variety of functions and tools that can be used for analysis of financial data. So, its binding for finance professionals to possess Excel skills. This course is designed to equip with the skills to use Excel for a wide range of financial analysis and reporting requirements.

Student Speak

Dr. Pasad Agashe

“ I used to trade with two eyes, but this course has given me a third eye, allowing me to observe the dynamics behind the candlesticks, such as how option chain parameters affect intraday price action!

Shrenik Doshi

“ It was an excellent course from which I learned a great deal, and as a result, I am now capable of managing both my own and my father's portfolios.

Sarita Agarwal

“ Everything was well-coordinated, from registration to course delivery. The instructors are highly skilled and knowledgeable about their respective training programs. All of the seminars had been really instructive. The practical examples we received during the sessions were quite beneficial.

Lalit Sharma

“ I was unsure if I would be able to understand it because I did not come from a financial background. The BIL informed me that they have experienced Lecturers who will explain everything to us in a way that we can understand. I am quite pleased that I enrolled in the course since it has greatly aided my professional development.
