

Certificate Program on
**Option Chain
Strategies for
Intraday Trading**

6 Days

Live Online

Mumbai | Delhi | Kolkata

Overview

An option chain is essentially a list of all the stock option contracts available for a given security (stock). Most of the traders would be actively trading in options, but very few understand how to make use of option chain data. Learning how to read an option chain is a vital component to options trading. Many traders lose money because they don't fully understand option chains. There are only two types of stock option contracts, puts and calls, so an option chain is essentially a list of all the puts and calls available for the particular stock you're looking at.

Whether a trader is looking to pad a long position by writing a covered call or buy a protective put for shares that the trader has shorted, knowing how to read an option chain should precede either one of these potential strategies. The option chain lists the available call and put strike prices for an underlying security.

Who should attend?

Individual investor with knowledge of stock markets, wealth manager, broker, equity traders

What will you learn?

Read and Analyse

Learn how to read and analyse an option chain

Areas of support and resistance

Use an Option Chain to identify areas of support and resistance

Student Speak

Dr. Pasad Agashe

“ I used to trade with two eyes, but this course has given me a third eye, allowing me to observe the dynamics behind the candlesticks, such as how option chain parameters affect intraday price action!

Shrenik Doshi

“ It was an excellent course from which I learned a great deal, and as a result, I am now capable of managing both my own and my father's portfolios.

Sarita Agarwal

“ Everything was well-coordinated, from registration to course delivery. The instructors are highly skilled and knowledgeable about their respective training programs. All of the seminars had been really instructive. The practical examples we received during the sessions were quite beneficial.

Lalit Sharma

“ I was unsure if I would be able to understand it because I did not come from a financial background. The BIL informed me that they have experienced Lecturers who will explain everything to us in a way that we can understand. I am quite pleased that I enrolled in the course since it has greatly aided my professional development.
